### **Additional comments of the participants of the workshop:**

- ✓ *The MATEGRA workshop was well-organised and allowed participants to interact with each other in encouraging atmosphere.*
- ✓ *It was very interesting to meet the Czech people.*
- ✓ *My impressions were more than positive. Great organization from Prof. Docheva and her team, interesting discussion with experts and great practical workshop.*
- ✓ *The most interesting part of workshop for me was the practical part in the labs, as well as when we tried to change hip joint on the model.*
- ✓ *Theoretical part was clear, understandable and showed us the problematic parts in the field of the MATEGRA project. The most interesting was implementation of stern in the hip joint in the practical part of workshop.*
- ✓ *I very much appreciated and enjoyed the lectures focused on cell types, interactions with materials, as well as lectures devoted to orthopaedic practice and inflammation caused by implantation. I also enjoyed a lot, the practical workshop on cell cultivation and bone replacement.*
- ✓ *I definitely enjoyed the practical part with Dr. med. Michael Galler. It was a lot of new information and experiences for me, on how the doctors work and how implants are replaced.*
